SUMMARY

Computer Science student with strong foundations in Java, AI, SQL, and modern web technologies. Hands-on experience in software development, Git, Docker, CI/CD, and database management through real-world projects. Quick learner with strong analytical and problem-solving skills.

EDUCATION

MIT ADT University , <i>B.Tech (CSE)</i> CGPA: 8.33	2023 – 2027 Pune
SSVPS College (HSC) , <i>Senior Secondary (12th grade)</i> Final Grade: 75%	2020 – 2022 Dhule
North Point School (ICSE) , <i>Secondary (10th grade)</i> Final Grade: 75%	2019 – 2020 Dhule

PROFESSIONAL EXPERIENCE

Prodigy Infotech , <i>Java Developer Intern</i> Designed and built functional RESTful APIs to seamlessly handle HTTP requests, process backend logic, and manage data flow. Utilized Postman for API testing and Git for version control.	07/2025 – 08/2025 Pune, India
---	----------------------------------

SKILLS

Tools & Platforms — VS Code, Git & GitHub, Postman, Jupyter Notebook, Figma, Eclipse IDE

Technical Skills — Java, HTML, CSS, Data Structures and Algorithms (DSA), SDLC, AI, Object-Oriented Programming, Python (basics), Docker & Container, Cloud Computing, Operating System (OS), Spring Boot, Spring MVC, Hibernate, Linux (basics), Git & GitHub

Soft Skills — Communication, Time management, Team collaboration, Problem Solving, Analytical Thinking

PROJECTS

LiDARNet: LiDAR Point Cloud Data Pipeline 🏠, *Python, PyTorch, PointMLP, Open3D*

- Developed a deep learning-based point-cloud classification pipeline for LiDAR data using PointMLP, processing spatial and sensor attributes including coordinates, GPS time, and reflectance.
- Implemented feature normalization, stratified dataset splitting, BatchNorm, Dropout, AdamW optimization, learning-rate scheduling, and early stopping to improve model training and generalization.
- Achieved 88.89% test accuracy on the HPC environment and integrated Open3D-based visualization to analyze predicted point-cloud classifications.

Tulip: Smart Childhood Development Tracker , *SpringBoot, Hibernate, Java, Gemini flash API*

- Developed an AI-powered developmental tracking platform to monitor pediatric milestones and provide structured insights based on child development data.
- Integrated the Google Gemini API to analyze developmental information and generate AI-driven observations and recommendations using structured prompts and JSON responses.
- Designed RESTful APIs and JSON-based data processing for handling developmental records, milestone tracking, and communication between application components.

E-Khata: Console-Based Application, *Java, Hibernate, SQL, Console based*

- Developed a console-based banking application for managing customer accounts and core banking operations, including account creation, deposits, withdrawals, and balance inquiries.
- Implemented CRUD operations, database connectivity, input validation, and exception handling using Advanced Java and Spring JDBC for reliable account management.
- Designed MySQL-based data persistence for storing and retrieving customer, account, and transaction information, providing a structured foundation for scalable banking workflows.

KEY ACHIEVEMENTS

Smart India Hackathon (SIH) Qualifier

01/07/2025

Qualified in the top 50 candidates institute-wide for Smart India Hackathon (SIH) 2025, competing across all engineering branches.

150+ LeetCode Problems Solved

Solved 150+ coding problems across Data Structures and Algorithms, strengthening problem-solving skills and proficiency in algorithmic thinking.

CERTIFICATES

Advance Java  (Learn Quest (Coursera))

Database Structures and Management with MySQL  (Meta (Coursera))

Introduction to Big Data with Spark and Hadoop  (IBM (Coursera))

Machine Learning  (Johns Hopkins University (Coursera))
